

NGUYEN ANH KHAI

Frontend Developer

☎ (+84) 945757051 | ✉ nakhai.fw@gmail.com | 🔗 linkedin.com/in/nakhai9 | 🌐 github.com/nakhai9

SKILLS

Programming Languages: TypeScript/JavaScript, Python, Java

Frameworks & Libraries: React.js, Angular, Next.js, Nest.js, Spring Boot, Electron Vite, Vite, Selenium WebDriver

Dev Tools: Jira, Git, TortoiseGit, Postman, DevTools, Render, Vercel

UI Component Libraries: Tailwind CSS, Bootstrap, MUI, Angular UI

Databases: MySQL, MongoDB, Firebase

Soft Skills: Teamwork, Communication, Time Management, Agile/Scrum

AI Skills: Use AI to code faster and review AI-generated code

EXPERIENCE

Fullstack Developer (frontend-focused)

07/2026 – Present

FPT IS Ho Chi Minh | Team of 15

Onsite

- **Technologies:** Desktop, React.js, MUI, Electron Vite, Java Spring Boot. Microfrontend
- Contributed to architecture design, technical estimation, implementation, and code reviews.
- Built the 3 screens of the desktop application.
- Built the 5 screens of the web application.
- Responsible for developing 3 of the system's 8 main modules.
- Handle responsive layout on Desktop app.
- Collaborated with team members to implement features, fix issues, and deliver the graduation project.
- AI tools: Claude, Codex

Frontend Developer

10/2025 – 06/2026

Transform Tech | Team of 8

Remote

- **Technologies Used:** Angular, Viettel UI Components, Java Spring Boot, Microfrontend, CQRS.
- Developed the user interface for the “Shared Data Storage” module
- Set up and developed the frontend architecture from the ground up, including a shared UI component system to improve maintainability and consistency.
- Broke down tasks and assigned them effectively to the team.
- Built 5 custom plugins for CKEditor 5 to support advanced document editing features.
- Collaborated with backend teams to integrate APIs and manage complex data flows in UI.
- Reviewed and optimized code to improve overall code quality and maintainability.
- Mentored and supported team members throughout feature development cycles.
- Developed multiple modules related to document management systems.
- AI tools: Cursor

Fullstack Developer

11/2022 – 10/2025

Simplify Dalat - Can Tho Branch | Team of 13

Onsite

- **Technologies Used:** Angular, Next.js, Selenium WebDriver, Zustand, NgRx, .NET, Microfrontend.
- Successfully migrated all UI components from a legacy PHP-based project to a modern Angular application, improving scalability and maintainability.
- Refactored application using Angular standalone components (v17).
- Optimized application performance, reducing redundant code and improving load time.
- Developed and integrated APIs between frontend and backend systems using .NET.
- Built 40+ reusable UI components, reducing development time and improving scalability across multiple features.
- Wrote automation tests using Selenium WebDriver to improve testing efficiency.
- Built an internal CMS system for over 1000+ users.
- Maintained and enhanced system features based on client feedback.
- Created user guides and documentation for end users.
- AI tools: Codex

EDUCATION

Can Tho University

09/2018 – 04/2022

Bachelor of Computer Science

PROJECTS

Khai Portfolio | *React.js, Tailwind CSS, TypeScript*

- Developed a personal portfolio website to showcase projects and technical skills.
- **Demo:** khai-portfolio.vercel.app

Trip Builder | *Spring Boot, Next.js, TypeScript, MUI, Express.js, MongoDB, Gemini*

- Developed a web application that allows users to easily create travel itineraries without requiring an account.
- **Demo:** trips-wheat.vercel.app

CentrixG | *Electron Vite, React.js, shadcn/ui, NestJS, i18n*

- Developed a game-selling website as a freelance project.
- Built the web interface and desktop application, then packaged the application as a Windows executable file.
- Integrated SePay to support online payments.
- **Demo:** centrixg.com
